PROFESSIONAL SUMMARY

B.Tech Information Technology graduate with hands-on experience in Python, Java, SQL, REST APIs, and Flask. Strong foundation in Object-Oriented Programming, databases, problem-solving, debugging, and software development. Experienced in developing and testing application projects, with an interest in backend and full-stack development.

PROJECTS

AI-Based Surveillance System with Anomaly Detection 11/2025 – 03/2026

- Developed a Python-based application for monitoring video footage and identifying unusual activities.
- Implemented object detection and tracking using image and video processing techniques.
- Prepared and processed datasets for application development and testing.
- Implemented anomaly-detection functionality to identify activities differing from expected behavior.
- Tested application functionality across multiple scenarios and analyzed results to improve performance.
- Debugged application issues during development and testing.

NEARBY SERVICES FINDER 03/2023 – 11/2023

- Developed a Python-based application to help users find nearby services based on location.
- Implemented location-based search using geographic coordinates and distance calculations.
- Integrated interactive maps to display service locations and search results.
- Used Flask for application development and REST API concepts for application functionality.
- Tested application functionality and validated location-based search results.

SKILLS

- **Programming Languages** — Python | Java | JavaScript | SQL
- **Web & Backend** — HTML | CSS | Flask | REST APIs
- **Database** — PostgreSQL | MySQL
- **Core Concepts** — OOP | Data Structures | Algorithms | Debugging | Testing | Problem Solving
- **AI/ML** — Pandas | NumPy | OpenCV | TensorFlow | YOLOv8 | Generative AI | LLM Concepts
- **Tools** — Git | GitHub | VS Code | PyCharm
